THE BRIDGE RIVER MINES.

To those who know the cautious, reticent, honest commander of the Bridge River Exploring Expedition, no confirmation of his report was necessary. They knew that if Mr. Jamieson said there was four cent dirt they might expect to find eight; that if he asserted they were paying diggings for two thousand pebbles, four thousand would be safe in going. The report itself was perhaps not faultless, and the expedition was not as satisfactory as it might have been, had the party not been strictly limited as to time. But to those who knew Mr. Jamieson, his report meant more than was expressed. The report from Hon. Mr. Elliott, which we published on Saturday, is important chiefly as corroborative evidence to those who needed such. Now, we presume, doubt will be at an end, and the Bridge River mines will be treated as a recognized fact, and as such will be entitled to official recognition, and their fair share of legislative attention. It is matter of regret to the public—we have no doubt it is matter of extreme regret to the Government—that there is no prospect of a trail being constructed to these new mines this year, and that, there being no trail available for the early spring, next mining season will be broken in upon, and much of it lost to that new country. We do not say that due diligence has been used by the Executive in this matter, nor would we like to assert that there has not. When a Government is cramped for funds it cannot always act just as it would wish, or as circumstances and public interests would appear to demand. Nor do unthinking outsiders always sufficiently discriminate between the will and the power of the Government to carry out any public work. The country will, however, expect, and it will have a right to expect, that there will be no delay in the spring in opening up a way to these new mines. The Government will then be expected to act with decision and energy—in right good earnest, so that the eager thousands will be enabled to go in and possess the land. We are not aware whether any serious question of competing routes presents itself in this case, as one would naturally infer from Mr. Elliott's report that there could hardly be a doubt upon that subject. If, however, there should be such an issue in the matter it is to be hoped the Government will be able to come to a final decision before spring, so that uncertainty upon that point may not paralyze prompt action when the moment for that action arrives. Let everything be in a thorough state of readiness, so that those who may desire to push their way into this new gold field may have an opportunity to be employed in making their own road in, and thereby be in the better condition to develop the latent resources of the country beyond. The traders of Lillooet will not, we feel assured, be behind hand with the necessary supplies, but will press hard on the heels of the road-makers.

AUDITOR:

THOMAS MCKINCH, Esq.

BANKERS:

THE BANK OF BRITISH COLUMBIA,

SECRETARY:

WILLIAM CLARSON, Esq.

This company is organized for the purpose of exploring and mining for Coal, and boring for Coal Oil. The character of the sandstone at Burrard Inlet, its identity with the coal-bearing sandstone of Bellingham Bay and Nanaimo, and the numerous indications of Coal to be found at different places on the Inlet and on English Bay, make it nearly certain that Coal measures similar to those of Bellingham Bay and Nanaimo will be found at a reasonable depth.

The company have secured a reserve of 600 acres on Coal Harbor, Burrard Inlet; also a right to mine on 600 acres on English Bay, giving to the company a coal field of 1200 acres in extent, and the British Columbian Government has pledged its support in every reasonable way.

It is the intention of the company to immediately put down a bore for Coal—the strong probability being that in less than 90 days the ground will have been prospected and the company ready to sink a shaft and open a mine.

If the Coal croppings at English Bay or Burrard Inlet should be succeeded, as is usually the case, by thicker veins below, it must become an invaluable property. The position of English Bay and Burrard Inlet renders the harbors easy of access in all winds and seasons. The shore is bold, so that no long wharves or piers would be needed, while the prices of Coal on the Pacific—averaging from two to three times the prices on the Atlantic—render the prosecution of Coal mining one of the most promising enterprises of the day.

The whole of the B. shares are now offered for subscription. The monthly calls on these will be adequate to meet the current expenses of prospecting; the subscribers to these shares incur a small risk, but they get a compensation—a \$50 share for the small sum of fifteen dollars.

Parties desirous of obtaining shares may be furnished with every information by applying to the Secretary, at the company's office, in New Westminster.

The company have engaged Mr. John Dick, a practical coal miner of many years' experience both in Scotland and Vancouver Island, to prospect and examine the locality of English Bay and Burrard Inlet. The annexed is his report:—

"To the Board of Directors of the British Columbia Coal Mining Company, Limited.

GENTLEMEN,—After a careful examination of several square miles of the country lying to the southward of Burrard Inlet, I take pleasure in being able to state that, although owing to the general regularity and unbroken nature of the beds of strata there visible have not been able to discover the outcroppings of any coal seam worthy of note, still there is every indication of the existence of such a seam at no great depth—say from 40 to 60 fathoms. Should my service prove correct there is no doubt (judging from the very trifling angle of dip, and its freedom from faults and other dislocations of strata) that the field will be quite equal in extent to any yet discovered on Vancouver Island.

For the purpose of further proving the quality of the Coal and its depth from the surface, I would recommend that a series of borings be commenced at such places as, after further deliberation, I shall be prepared to point out. I am, Gentlemen,

Your obedient servant,

JOHN DICK.

ALL CURES MADE EASY!!

HOLLOWAY'S OINTMENT.

Bad Legs, Ulcerous Sores, Bad Breasts and Old Wounds.

No description of wound, sore, or ulcer can resist the healing properties of this excellent Ointment. The worst cases readily assume a healthy appearance whenever this medicament is applied; sound flesh springs up from the bottom of the wound, inflammation of the surrounding skin is arrested, and a complete and permanent cure quickly follows the use of the Ointment.

Piles, Fistulas and Internal Inflammation.

These distressing and weakening diseases may with certainty be cured by the sufferers themselves, if they will use Holloway's Ointment, and closely attend to the printed instructions. It should be well rubbed upon the neighbouring parts, when all obnoxious matter will be removed. A poultice of bread and water may sometimes be applied at bed time with advantage, and most scrupulous cleanliness must be observed. If those who read this paragraph will bring it under the notice of such of their acquaintances whom it may concern, they will render a service that will never be forgotten, as a cure is certain.

Rheumatism, Gout & Neuralgia.

Nothing has the power of reducing inflammation and subduing pain in these complaints in the same degree as Holloway's cooling, Ointment and purifying Pills. When used simultaneously they drive all inflammation and depravities from the system, subdue and remove all enlargement of the joints, and leave the sinews and muscles lax and uncontracted. A cure may always be effected, even under the worst circumstances, if the use of these medicines be persevered in.

Eruptions, Scald Head, Ringworm & other Skin Diseases.

After fomentation with warm water, utmost relief and speediest cure can be readily obtained in all complaints affecting the skin and joints, by the simultaneous use of the Ointment and Pills. But it must be remembered that nearly all skin diseases indicate the depravity of the blood and derangement of the liver and stomach, consequently, in many cases, time is required to purify the blood, which will be effected by a judicious use of the Pills. The general health will be readily improved, although the eruption may be driven out, more freely than before, and which should not be promoted; perseverance is necessary.

Sore Throats, Diphtheria, Quinsey, Mumps & all other Derangements of the Throat.

On the appearance of any of these maladies the Ointment should be well rubbed at least three times a day upon the neck and upper part of the chest, so as to penetrate to the glands, as salt is forced into meat: this course will at once remove inflammation and ulceration. The worst cases will yield to this treatment by following the printed directions.

Scorfula or King's Evil and Swelling of the Glands.

This class of cases may be cured by Holloway's purifying Pills and Ointment, as their double action of purifying the blood and strengthening the system renders them more efficacious than any other remedy for all complaints of a scorfulous nature. As the blood is impure the liver, stomach and bowels, being much deranged, require purifying medicine to bring about a cure.

Both the Ointment and Pills should be used in the following cases:—

Bad Legs.	Contracted Hands.	Scalds.
Bad Breasts.	Stiff Joints.	Sore Nipples.
Rheum.	Elephantiasis.	Sore Throats.
Blisters.	Fistulas.	Skin Diseases.
Rite of Mosquitoes.	Gout.	Scorfula.
and Sand-Flies.	Chilblains.	Sore-heads.
Chilblains.	Glandular Swellings.	Tumors.
Chilblains.	Chilblains.	Ulcers.
Chilblains.	Chilblains.	Wounds.
Chilblains.	Chilblains.	Yaws.
